

TECHNICAL REVIEW

A. Upon completion of a case, a second qualified examiner will give the entire case packet a technical review. The following is a list of items to be examined during technical review:

A.1 Submitting agency item numbers are included where possible and correct

A.2 Necessary positive controls are completed and documented in the case notes including lot# and expiration date

A.3 A water control was collected where needed

A.4 Examination(s) requested by the submitting agency have been completed where appropriate

A.5 Evidence description provided in case notes and corresponds to examination request form or an explanation for difference documented

A.6 All positive test results included in report. Where appropriate, negative test results are included.

A.7 Samples have been referred to the DNA section where needed

A.8 Samples have been referred to other sections when requested.
